EDUCATION

Johns Hopkins University

M.S., Engineering Management; GPA: 3.9

Baltimore, MD

Aug 2024 – May 2026

Coursework: Artificial Intelligence, Software System Design, Fundamentals of Product Management, Strategies for Innovation & Growth, Accounting & Finance, Agile Methodologies, Data Storytelling & Visualization

Visvesvaraya Technological University

B.Tech, Computer Science; GPA: 3.8

Bangalore, India

Aug 2020 – May 2024

RELEVANT EXPERIENCE

Weber Shandwick

AI & Analytics Intern

Jul 2025 – Present

Washington, DC

- Built AI workflows and multi-step agents using n8n, Vertex AI, and Claude MCP, then productized the strongest patterns into reusable templates adopted by 4 cross-functional teams across analytics, strategy, and CX
- Partnered directly with analytics and strategy teams across verticals to scope use cases, applying prompt engineering and retrieval techniques to cut manual research time by **60%** for enterprise clients including BCG, AWS, KPMG, and CDC
- Automated the Culture Compass reporting pipeline end to end (sourcing, cleaning, and normalizing data into a standardized output), then tracked adoption metrics and iterated until it became an official deliverable replicated across teams
- Engineered LLM-based monitoring pipelines using SQL and classification workflows to track brand visibility and citation patterns across ChatGPT, Perplexity, and Claude, reporting trends and recommendations directly to senior stakeholders

Trax Retail

Product Strategy Consultant

Oct 2024 – Dec 2024

Baltimore, MD

- Launched an AI task allocation system by scoping requirements and designing workflow logic, cutting manual intervention by **40%** and response time from 5+ hours to minutes
- Tracked a **25%** efficiency gain post-launch by defining 6 core KPIs, building Tableau dashboards for response time and task completion, and reporting findings to leadership to guide rollout decisions
- Designed human-in-the-loop review checkpoints into the automation workflow, keeping outputs auditable and giving non-technical stakeholders the visibility to trust and continue adopting the system

Kahana

Product Management Intern

Aug 2024 – Dec 2024

Baltimore, MD

- Mapped B2B growth opportunities through market research and customer segmentation, surfacing 12 qualified client profiles that shaped go-to-market strategy
- Uncovered activation and conversion friction through usability testing and funnel analysis, translating findings into sprint-ready requirements that improved product-market fit by **20%**

Carl Zeiss

AI Product Developer Intern

Jan 2024 – Jul 2024

Bangalore, India

- Developed an ML-driven enterprise application end to end, designing system architecture and CI/CD pipelines with automated QA, reducing manual processing time by **40%**
- Integrated RESTful APIs, OpenSearch, and SQL-based systems with Azure using Docker and SAP, improving deployment rate by **35%** through rigorous UAT and E2E testing

PROJECT EXPERIENCE

Mood Mate: AI Mental Health Counseling Chatbot

Product Lead & AI Developer

Jun 2023 – Jan 2024

- Shipped an LLM-powered conversational agent end to end using LangChain and LangGraph, implementing RAG with vector embeddings and modular prompt pipelines, lifting beta engagement by **40%**
- Diagnosed inconsistent output quality back to unstructured retrieval rather than the model itself, then rebuilt the retrieval pipeline and ran structured experiments across prompting, response formatting, and UX flows to identify what actually drove activation versus drop-off
- Owned the full product loop solo, instrumenting usage and sentiment signals and closing the feedback loop into the next iteration, treating reliability as a system design problem rather than a one-time prompt fix

SKILLS SUMMARY

AI & Workflow Automation: Prompt Engineering, Retrieval-Augmented Generation (RAG), Agentic AI, AEO/GEO/AIO, Multi-step AI Agents, MCP Integrations, LLM APIs (Anthropic, OpenAI, Gemini), n8n, LangChain, LangGraph, Cursor, Claude Code

Analytics & Reporting: Trend Analysis, KPI Tracking, SQL, Python, ETL Pipelines, BigQuery, Tableau, Power BI, Looker, Google Analytics, Data Storytelling, Retool

Solutions & Project Management: Cross-functional Stakeholder Partnership, Use Case Scoping, Template & Playbook Design, Use Case Productization, Customer-facing Solutioning, Agile/Scrum, Jira, Notion, Figma

Technical: Python, SQL, Java, TypeScript, R, Go, C#, REST APIs, Azure, Docker, Git, CI/CD, Vertex AI, Replit
